

Software Developer

Daniel Popovic

Objective

I am an expeditious learner who is seeking a junior entry level position focused on Software Engineering with a progressive and reputable company. My analytical skills, along with experience in a variety of programming languages that include Java, Python, and JavaScript, provide me with the ability to deliver innovative ideas that assist the technological development of the organization.

Below you'll find projects I've completed that showcase my skills and general background in developing software.

Experience

Freshhouse: Food and Juice Bar Website (<https://freshhouse.ca/>)

Lead a project with web developers to redesign and develop a brand-new website for Freshhouse Food and Juice Bar using JavaScript, CSS3, and Adobe XD. Implemented a SDLC for the project, developed various prototypes, tested user experience, designed all product images, and refined website's backend prior to launch. Results contributed to the increase in web traffic and customer satisfaction.

Burger or Steak? (<https://bit.ly/2QvRahE>)

This is a web application built using Angular 11, which contains an online order form for a restaurant. The menu contains two major items - burgers and steaks. It was developed to demonstrate the functionality of Angular forms.

Vinyl REST API (<https://bit.ly/3sGnBHq>)

Vinyl REST API developed in order to demonstrate how to build a Python Flask REST API integrated with a Flask SQL-Alchemy database.

Discogs Decisive (<https://bit.ly/3f1J22p>)

A CLI program written in Python 3 which will generate three random albums from a user's Discogs collection, based on what genre the user wants to listen to.

Education

B.A: Hons.
Information Technology
York University

Skills

- Java
- Python
- Linux
- JavaScript
- React.js
- DBMS
